# Workshop: Finding your Purposeful Climate Path

with Linda Aspey - climate leadership coach

Thursday 18th January | 4 - 7pm  
or  
Friday 2nd February | 5 - 8pm

Explore what climate means to you and how you can use your feelings as fuel for positive action.

Have you thought about the difference you can make to climate change and ecological breakdown, whether at small scale in your own life or larger within your community or work role?

If you have, CK Parish Council and CK Futures invites you to a workshop in January or February, exploring what climate and ecological change really means to you and how emotions are essential fuel for positive action.

Facilitated by Linda Aspey, an experienced climate leadership coach, these sessions are built on the "Work that Reconnects" a series of experiences used all over the world that facilitate the building of individuals, communities and organisations into potent and resilient forces for positive change. Come along, make new connections and hopefully, find a purposeful path forward.

There are just 14 places on each workshop. Minimum age 18, 16 if accompanied by an adult.
